

NOKTA BT HEADPHONES

USER GUIDE

INTRODUCTION

NOKTA BT Headphones utilizes aptX™ Low Latency technology, which compared to standard Bluetooth®, delivers a faster and better quality audio. Therefore, when used for metal detecting, the Nokta BT Headphones will provide more precise and faster target responses.

FUNCTIONS & OPERATION

Power on: Slide the switch to ON, the green light comes on and the headphones are turned on.

Power off: Slide the switch to OFF.

Bluetooth® Pairing Mode: When you turn the headphones on and hear "Power on", it will enter into pairing mode.

When you turn on the Bluetooth® connection on your detector, they will pair automatically.

On other devices, turn your BT connection on and search for "NOKTA-MAKRO" and click it to pair. Once connected, you will hear the prompt "connected".

Clear pairing: Long press MODE button and "V+" at the same time for 3 seconds while the device is on to clear paired devices.

NOTE! Within the pairing range, the headphones will automatically connect to the last paired devices in memory.

Phone Functions

Answer a call: Short press MODE button to answer the call.

Refuse a call: Long press MODE button about 1 second to ignore an incoming call.

Call hang up: Short press MODE button to hang up the call.

Last number redial: Double click MODE button to call the last number when it's connected with your mobile phone.

Switching devices: During a call, long press "V+" button about 1 second to switch between the headphones and the mobile phone.

Voice dialing: Press MODE button for 1 second in "standby" status to trigger voice dial and turn on the phone's voice assistant.

Mute: Short press "V+" and "V-" buttons at the same time to mute and unmute.

Music Functions

Play & Stop: Press MODE button to play and stop the music.

Volume up: Press "V+" to increase the volume. Maximum level will be indicated with a beep.

Volume down: Press "V-" to decrease the volume. Minimum level will be indicated with a beep.

Previous track: Press and hold "V-" button for 2 seconds to play the previous song.

Next track: Press and hold "V+" button for 2 seconds to play the next song.
